OUR PRICES

GENERAL, PREVENTATIVE, COSMETIC & CHILDREN'S DENTAL

northsidedentalsolutions.com.au

FIXED, AFFORDABLE PRICES WITH NO BILL SHOCK

We are one of the first practices on the north side of Brisbane to publish our dental treatment prices online. We offer outstanding quality of care for our patients but believe that dental treatment should be affordable and costs should be transparent.

We advocate for patient centred care including the right to understand the cost of our services without any hidden fees or surprises.

As a patient of our practice, you can pay for the dental treatment as you go or we can quickly set up an interest free payment plan to spread the cost of your treatment allowing you to get started straight away.

Our fees are outlined in the table below. This list is not exhaustive but covers 90% of the treatment we deliver. We have included the health fund codes for those of you that have private health insurance. The rebate you will receive will be different for everybody and for each insurance policy. We can use your health fund card to estimate your future rebates at your first visit.

Our new patient examination includes diagnosis, X-rays, photos, oral cancer screening and written treatment plan quotes. The cost of this examination is \$85 or gap free if you have a health fund.
